an image transfer device for reading and transferring an image from a first medium, the image transfer device including a reader for reading the image on the first medium, and a display exclusively used by the image transfer device for displaying an image transfer menu for effecting transfer of the image; and

A.
CDN-1

a computer removably connected to the image transfer device;

wherein when the image transfer device is not connected to the computer the image transfer device has a first type of the image transfer menu available for display on the display of the device, and wherein when the image transfer device is connected to the computer the transfer device has a second type of the image transfer menu available for display on the display of the device.

REMARKS

Claims 1 through 26 remain in the application. Claim 1 has been clarified by amendment. The amendment to claim 1 is not narrowing and does not create prosecution history estoppel.

A marked-up version of the rewritten claim is attached hereto.

Claims 1-26 were rejected under 35 USC 103(a) as being unpatentable over Cotte et al. (US 5,499,108).

Claim 1 as amended is directed to an electronic assembly including an image transfer device. The image transfer device includes a reader for reading an image on a first medium, and a
